HENRIK MALMSTRÖM ON BORROWED TIME

Henrik Malmström photographed his terminally ill sister up until her death. She suffered from ovarian cancer for eight years and the book covers the final two years. It is comforting to see and read about the family, across 40 black-and-white images mostly taken in a clinic, with intermittent impressions of travel. The relation between the photographer and his older sister is at the heart of the book, turning it into an exceptional document.
